Education

Ph.D. in Economics, University of Nottingham, *expected 2024*
Advisors: Prof. Giammario Impullitti, Dr. Juan Ignacio Vizcaino, Dr. Alessandro Ruggieri

Visiting Student, Fundació MOVE, UAB, hosted by: Prof. Joan Llull, Jan-Jul 2022

MSc in Economics and Economic Policy, summa cum laude, University of Bologna (Italy), 2017

BSc in Business and Administration, Marche Polytechnic University (Italy), 2014

Fields of Interest

Primary: Applied Econometrics, Labor Economics
Secondary: Spatial Economics, Migration Economics

Research

Working papers

"Skills, Distortions, and the Labor Market Outcomes of Immigrants across Space" *Job Market Paper*
"Peter Sinclair Prize" - 3rd best paper, Macro Monetary Finance Society PhD Conference
I study the geography of immigrants' labor market outcomes and its implications for spatial inequality. Using US micro-data, I document that, compared to natives and immigrants from high-income countries, immigrants from low-income countries i) do not earn a premium from working in big cities and ii) are more likely

to work in non-cognitive occupations and live in big cities. To shed light on the mechanisms driving these facts, I build a quantitative general equilibrium spatial model where the technology of firms in cities favors cognitive skills, workers are heterogeneous in human capital and tastes for cities and occupations, and immigrants face labor market distortions. Removing all sources of heterogeneity between immigrants and natives reduces their earnings gap by 29 percent at the expense of an increase in the earnings gap between cities by 2.3 percent. An immigration policy opening borders to non-college-educated workers increases the earnings gap between immigrants and natives by 2.6 percent but reduces the earnings gap between cities by 0.3 percent.

"Unlucky Migrants: Scarring Effect of Recessions on the Assimilation of the Foreign-Born", with Alessandro Ruggieri

This paper studies how aggregate labor market conditions affect the intra-generational assimilation of immigrants in the hosting country. Using data from the American Community Survey, we leverage variation in the national unemployment rates in the U.S. at the time of arrival of different cohorts of immigrants to identify short- and long-run effects of recessions on their careers. We document that immigrants who enter the U.S. when the labor market is slack face large and persistent earnings reductions: a 1 p.p. rise in the unemployment rate at the time of migration reduces annual earnings by 4.9 percent on impact and 0.7 percent after 12 years since migration, relative to the average U.S. native. Change in the employment composition across occupations with different skill contents is the key driver: were occupational attainment during periods of high unemployment unchanged for immigrants, assimilation in annual earnings would slow down on average by only 3 years, instead of 12. Slower assimilation costs between 1.7 and 2.4 percent of lifetime earnings to immigrants entering the U.S. labor market when unemployment is high.

Work In Progress

"Labor Market Power and Demographics across Space", with Manuel V. Montesinos

This paper studies the relationship between labor market power and local demographic structures, and its implications for labor earnings inequality. Using longitudinal data from Spain, we show how local labor market dynamics interact with the human capital of workers across different age groups and investigate the role of local labor markets' occupational structure. We build a dynamic quantitative spatial equilibrium model to quantify the mechanisms driving our findings. The model provides us with a laboratory to study the role of demographics in determining local labor market power and simulate policy changes to quantify their impact on labor market power and income redistribution.

Presentations at Seminars, Workshops and Conferences

2024: ISEG Lisbon (*scheduled*)
2023: MMF PhD Conference, The Economics of Migration Junior Seminar, 2nd PhD and Post-Docs Workshop NSE, SAEe Salamanca
2022: RES Easter School, Nottingham PhD Conference, BSE PhD Summer Jamboree, UAB Macro Club, Nottingham Macro Working Group
2021: Edinburgh-Nottingham Macro Workshop, Nottingham Macro Working Group
2020: Nottingham PhD Conference, Nottingham Macro Working Group
2019: Nottingham PhD Conference

Teaching Experience

Lecturer

Economics & Statistical Methods (2023), University of Nottingham
Study Skills Microeconomics (2023), University of Nottingham

Graduate Teaching Assistant

Financial Economics (2020), University of Nottingham

Undergraduate Teaching Assistant

Economics Dissertation (2023), University of Nottingham
The Politics of Economics and the Economics of Politicians (2023), University of Nottingham
Stata e-clinics (2023), University of Nottingham
Applied Econometrics I (2022, 2023), University of Nottingham
Growth and Development in Long-Run Historical Perspective (2021), University of Nottingham
Public Sector Economics (2021), University of Nottingham
Microeconomic Theory (2020), University of Nottingham
Mathematical Economics and Econometrics (2019, 2020), University of Nottingham

Relevant positions

Teaching

Teaching Associate, University of Nottingham, Sep 2023- Aug 2024

Research Assistant

Research Assistant for Dr. Alessandro Ruggieri, Dr. Adam Spencer, Dr. Jake Bradley, Jun 2020-Jun 2021
Research Assistant for Prof. Facundo Albornoz, Dr. Roberto Bonfatti, Dr. Valeria Rueda, Dec 2019- Feb 2020

Professional Activities

Referee

Scottish Journal Of Political Economy

Extra Courses/Summer Schools

"Fourth SAEe PhD School in Economics" (Salamanca, December 2023)
"Recent Developments in the Economics of Monopsonistic Labor Markets" (CEMFI, September 2023)
"Dynamic Structural Models for Policy Evaluation" (BSE, July 2019)
"Migration Economics" (PSE, June 2019)

Other Academic Activities

PhD Students Representative at the School of Economics - University of Nottingham (2020-2022)
Scientific Committee RES Symposium of Junior Researchers (2020)

Fellowships & Awards

Postgraduate Teaching Research Scholarship, School of Economics, University of Nottingham
Faculty SEM commendations for high student satisfaction 2022/2023, University of Nottingham
GTA Teaching Award 2022/2023, University of Nottingham
GTA Teaching Award 2021/2022, University of Nottingham
GTA Teaching Award 2020/2021, University of Nottingham

Skills

Languages: Italian (native), English (fluent), Spanish (Basic)
Programming: Stata (advanced), Julia (beginner), R (beginner)
